

**FOR IMMEDIATE RELEASE**

**Universal Solar Technology's, Entrex Carbon Market  
and Net Zero Analysis Commit to Carbon Neutrality**

**Boca Raton, Fl. June 27, 2019:** Today Universal Solar Technology (UNSS) with Entrex Carbon Market and Net Zero Analysis are pleased to announce their joint commitment to becoming carbon neutral.

The Entrex Carbon Market utilizes Entrex's blockchain enabled technology platform to trade carbon credits, carbon offsets and other environmental securitized products. The platform allows credits, offsets and other environmental products to be found, researched, tracked, managed and traded via regulated entities through a compliant platform.

"We today launched our group efforts to become the first Fintech Trading Platform to commit to be Certified Carbon Neutral," said Stephen H. Watkins, CEO of Entrex Carbon Market. Watkins further explains that the partnership with Net Zero Analysis, is working through the International Standards Organizations (ISO) steps to bring the 3 companies and into compliance with certification by independent ISO entity. "Whether an organization is buying, selling or retiring Carbon Offsets, our companies, platform, and processes will be carbon neutral, we encourage and support all corporate participants in their carbon neutrality goals" continued Watkins.

"There's been amazing coordination from all sides to achieve our ISO Scope 1 Carbon Emission Determination and Emissions Offset by the end of 2019," suggested George Sullivan, CEO of Net Zero Analysis. "With offices in varied international locations and international Carbon Offset issuers we expect to see the ISO Scope 2 Carbon Emissions Determination completed by mind 2020, and we will be offsetting our Scope 1 & 2 Carbon Emissions by 3 quarter of 2020. We delivered what the market wanted by securitizing Carbon Offsets and believe that the time is now for the Entrex Carbon Market to become the global trusted Carbon Offset trading solution that is Carbon Neutral".

"This is indeed a milestone moment," said Paul D. Landrew, CEO of UNSS. "The Entrex Carbon Market team has been aggressively working since our Joint Venture agreement and capital commitment two months back. Watkins and our colleagues at Net Zero Analysis in Chicago have painstakingly assembled the technology and offerings to launch – maybe 19 years in the making – but it looks like less than one quarter to cash-flow -- incredible! Plus the First Carbon Neutral Tech and Fintech company in 18 months – groundbreaking!"

"This is a tremendous step forward for UNSS and our investors," Landrew continued. We expect the trading market to propel UNSS into a leadership position in the sector, utilizing the proven technology created by the Entrex team. It also gives the ability to buy out the equity owners, providing even more anticipated value for our shareholders."

**About Entrex:**

Entrex was founded in 2001 as a "capital market system for entrepreneurial companies." The new joint venture will utilize Entrex's intellectual properties and blockchain enabled technologies; built and proven over 17 years using IBM's Domino and Hyperledger technology platforms. The Entrex platform originates, structures, offers, places, trades, settles and services debt and equities of entrepreneurial companies through regulated entities that serve investors and issuers. Working together with industry sector leaders and regulated market constituents allows investors to find, research, track, manage, and trade entrepreneurial securities while providing entrepreneurial companies access to capital. ## **Forward Looking Statements:**

This press release includes statements of the Company's expectations, intentions, plans and beliefs that constitute "forward looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 and are intended to come within the safe harbor protection provided by those sections. These statements, which involve risks and uncertainties, relate to the discussion of the Company's business strategies and its expectations concerning future operations, margins, sales, new products and brands, potential joint ventures, potential acquisitions, expenses, profitability, liquidity and capital resources and to analyses and other information that are based on forecasts of future results and estimates of amounts not yet determinable. These also include statements relating to the anticipated benefits of the announced transaction between the Company and Entrex. These statements include any statement that does not directly relate to a historical or current fact. You can also identify these and other forward-looking statements by the use of such words as "may," "will," "should," "expects," "intends," "plans," "anticipates," "believes," "thinks," "estimates," "seeks," "predicts," "could," "projects," "potential" and other similar terms and phrases, including references to assumptions. These forward looking statements are made based on expectations and beliefs concerning future events affecting the Company and are subject to uncertainties, risks and factors relating to its operations and business environments, all of which are difficult to predict and many of which are beyond its control, that could cause its actual results to differ materially from those matters expressed or implied by these forward looking statements. These risks include the Joint Venture's ability to successfully pursue its business plan, the possibility that the Company's equity interest in the Joint Venture may be diluted as a result of capital raises by the Joint Venture, the possibility that Entrex may have the right to repurchase the previously contributed assets for nominal consideration, the Company's ability to develop and commercialize new technologies, the Company's history of losses and expectation of further losses, its ability to expand its operations into blockchain technologies, its ability to develop or acquire new brands, the success of its marketing activities, the effect of competition in its industry and economic and political conditions generally, including the current economic environment and markets. More information about these and other factors are described in the reports the Company files with the Securities and Exchange Commission, including but not limited to the discussions contained under the caption "Risk Factors." When considering these forward looking statements, you should keep in mind the cautionary statements in this press release and the reports the Company files with the Securities and Exchange Commission. New risks and uncertainties arise from time to time, and the Company cannot predict those events or how they may affect it. The Company assumes no obligation to update any forward looking statements after the date of this press release as a result of new information, future events or developments, except as required by the federal securities laws.
