ENTREX CARBON MARKET JOINT VENTURE

The Entrex Carbon Market was created through the execution of a Letter of Intent Agreement which created a joint venture between the Entrex Capital Market, LLC and Universal Solar Technology Corp (OTC:UNSS), a public company.

The mission of the joint venture is to bring capital and technology together using Entrex's proven IBM Hyperledger technology to bring safety, security and efficiency to the trading of environmental securities.

Press release available [click here](#).

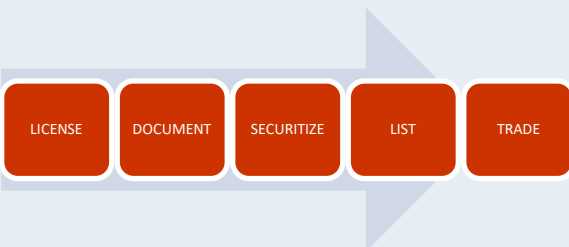

NET ZERO ANALYSIS

Net Zero works together with Entrex to reduce carbon emissions through renewable energy market transformation.

Working with international offset verifiers and producers Net Zero Analysis helps entities gain access to the Entrex Carbon Market and assisting in professional origination; maximize visibility and placement.

ISSUER DOCUMENTATION PROCESS

The Issuance process has been well proven across regulated market constituents and allows all parties comfort in the proven listing and trading process.

CARBON OFFSET TRADING PROCESS

Issuers of Carbon Offsets can sell their securitized Carbon Offsets on the Entrex Carbon Market by working together with Entrex Market Members.

Each Issuer initiates from a worldwide recognized Carbon Offset resource before securitizing offsets on the Entrex Market.

Entrex Carbon Market Members can then assist you through the Licensing, Documentation, Listing and Sales of your Offsets.

SAFE

Buyers need to know not only what is being represented is factual – but if not there are regulators to enforce any fraud or misrepresentations. The Entrex Carbon Market only works with regulated parties on both the buy and sell side of a carbon offset trade.

EFFICIENT

As legislators and regulators look for companies to be carbon neutral – the Entrex Carbon Market let's institutions who manage monies or capital across Wall Street a known market to rely – they already have people and processes in place to buy from regulated markets. Issuers can offer Buyers a regulated market to trade simplifying their order management process similar to other institutional trading platforms.

OFFSETS AND SERIALIZATION

Securitization is a formal process executed by experienced SEC regulated FINRA market members which allows a corporation to certificate specific carbon offset assets. Regulated Market Members therefore create a sellable securitized certificate representing the offset which has various indicated rights and warranties and most important the fortification of the Securities and Exchange between regulated market members which protects BUYERS from any un-orthodox mis-representations of carbon offset sellers.

EXPOSURE, CREDIBILITY AND LIQUIDITY

The Entrex Carbon Market makes selling your offsets to sophisticated buyers easy and uniform. Through regulated market constituents buyers know they can efficiently trust the sellers to represent their product correctly and can rely on market trades for regulatory purposes.
